

KEVIN WAGNER

FRONT-END DEVELOPER | REACT & VANILLA JAVASCRIPT | RESPONSIVE WEB INTERFACES

Klamath Falls, OR | (310) 228-8051 | kevin@kevin-wagner.org | kevin-wagner.org | linkedin.com/in/kev613

PROFESSIONAL SUMMARY

Front-end and full-stack developer with hands-on experience building responsive browser applications using JavaScript, React, HTML5, CSS3, Node.js, and REST services. Combines reusable React components with custom vanilla-JavaScript component, state, and event patterns developed for Impala Streamer. Brings more than a decade of technical delivery experience, strong Adobe production skills, and a detail-focused approach to cross-browser behavior, debugging, accessibility, performance, and user-centered design.

FRONT-END TECHNICAL SKILLS

Front End: JavaScript (ES6+), React, HTML5, CSS3, responsive design, media queries, reusable components, routing, authentication

CSS Systems: CSS custom properties and design tokens, Tailwind CSS, Bootstrap, reusable component styles, utility patterns, layout and breakpoint systems

Browser Engineering: DOM and event architecture, client-side state, Fetch/REST, Chrome DevTools, Console/Network diagnostics, cross-browser testing

Full Stack & Delivery: Node.js, Express, C#, Python, Django, MongoDB, Firebase, JSON, Git/GitHub, Netlify, local/cloud integration

Creative Tools: Adobe Photoshop, After Effects, Premiere Pro; web asset preparation, interface composition, motion and visual production

SELECTED FRONT-END PROJECT EVIDENCE

Impala Architecture & Impala Streamer | Discrete Development 2024-Present

- Built a working browser-based media environment in vanilla JavaScript and Node.js using reusable UI modules, centralized state, event-driven updates, routing, authentication, user preferences, diagnostics, and independently deployable services.
- Created a React-like development model without a framework where the application required direct control: components own focused behavior, shared state coordinates playback and preferences, and events keep independent interface regions synchronized.
- Designed responsive interfaces with CSS custom properties/design tokens, reusable component styles, predictable layout rules, and browser-aware media controls; tested behavior across Windows, macOS, modern browsers, and resource-constrained hardware.
- Implemented synchronized playback, position and seeking, private/local library access, chat, and isolated service behavior while maintaining a fast, direct user experience.

Full-Stack Application Portfolio | Independent Development 2024-Present

- Built and deployed React and JavaScript applications with reusable components, client-side routing, authentication, responsive layouts, and integrations with Node.js/Express, Django/Python, MongoDB, and Firebase back ends.
- Available examples include the Craftsman portfolio using Tailwind CSS, plus Lifeplan, ToDo front/back ends, Cookbook, HSE Good Catch, and Concentration; source and live-project links are collected at kevin-wagner.org.

PROFESSIONAL EXPERIENCE

Founder & Software Consultant | Discrete Development, LLC 2025-Present | Oregon / Remote

- Architect and deliver custom browser applications, Microsoft 365 solutions, and independently deployable services from requirements discovery through testing, release, documentation, and support.
- Translate operational requirements into simple, maintainable interfaces; balance visual quality, accessibility, performance, and user control while avoiding unnecessary complexity.
- Use Git-based workflows and production diagnostics to isolate defects, validate releases, and improve application behavior across connected client and service layers.

Cloud Support Specialist | Freudenberg Medical 2021-2024

- Designed and supported browser-based business interfaces, forms, reporting, and workflow automation in a global Microsoft 365 environment serving more than 1,200 users.
- Managed 10+ concurrent initiatives, diagnosed production issues, communicated clearly with nontechnical stakeholders, and delivered structured, supportable solutions under active business deadlines.

Project Manager / PMO Co-Lead | Freudenberg Medical 2015-2021

- Co-established the PMO and created SharePoint-based lifecycle tools, governance processes, SOPs, status reporting, and training resources.
- Led 5+ concurrent global SAP and business-system projects with cross-functional teams of up to 50 people from planning through post-implementation review.

SAP Data Migration Specialist | Freudenberg Medical 2013-2015

- Led master-data migration for global SAP implementations, integrated ERP and non-ERP sources, and developed validation methods supporting successful go-live events.
- Translated system dependencies for business SMEs and established repeatable migration and data-governance practices.

ADDITIONAL APPLICATION EXAMPLES

Example	Technology Pattern	Evidence Available
Impala Streamer	Vanilla JS component/state/event architecture; Node services; responsive CSS	Working product, product page, screenshots, installer, and live demonstrations
React portfolio	React components, routing, authentication, responsive UI	Live deployments and code examples through personal portfolio
Craftsman portfolio	Tailwind CSS utility classes, responsive layouts, reusable visual patterns	Live portfolio example and source code
Design systems	CSS custom properties/design tokens, Bootstrap, reusable styles, responsive breakpoints	Impala Streamer and portfolio interface examples
Creative production	Photoshop, After Effects, Premiere Pro; optimized visual assets	Professional broadcast work and current product/brand materials

EARLIER TECHNICAL & CREATIVE LEADERSHIP

Implementation Engineer, Chief Engineer, Technical Operations Manager, and Video Editor roles across NBC, Cimarron Bacon O'Brien, Quark Entertainment, and New Wave / Electric Entertainment (1993-2013). Delivered system implementations, technical troubleshooting, workflow transitions, AV/IT infrastructure, vendor coordination, and visual production; increased production capacity by 35% in a chief-engineer role.

EDUCATION & PROFESSIONAL DEVELOPMENT

- General Assembly - Full-Stack Software Development: HTML, CSS, JavaScript, React, Node.js, Express, Python, Django, client/server integration, and deployment
- Sony Video Institute and AVID Technology - Broadcast systems, editing, troubleshooting, and applied technology certifications
- DeVry University and university coursework - Digital/low-voltage circuits, business administration, mathematics, engineering, psychology, and conflict resolution

WORKING STYLE

Detail-oriented delivery | Responsive and accessible interfaces | Cross-browser troubleshooting | Clear client communication | Fast learning | Ownership from diagnosis through release
