

KEVIN WAGNER

Cloud Administration | ERP Integration | Project Management | Technology Consulting

Klamath Falls, OR | (805) 651-3043 | kevin@kevin-wagner.org | kevin-wagner.org | linkedin.com/in/kev613

PROFESSIONAL SUMMARY

Technical systems specialist with 12+ years designing, administering, and modernizing enterprise information systems across regulated environments. Extensive experience with Salesforce, IQMS, SAP, and custom ERP data mapping, including structured imports/exports, schema design, and workflow automation. Skilled in automating electronic communications (email, SMS, mail merge), improving data quality, and supporting staff through training and documentation.

Led global data migrations, built automated communication pipelines, and supported 1,200+ users across Microsoft 365 and CRM ecosystems. Adept at translating operational requirements into maintainable system configurations, ensuring data accuracy, and synchronizing data across CRM and ERP/SIS platforms.

CORE COMPETENCIES

Salesforce Administration & Customization • ERP Integration (IQMS, SAP, custom ERP data mapping) • Data Import/Export, Validation & Quality Control • Workflow Automation (SharePoint / Dataverse / PowerAutomate • Form Assembly, Admissions Connect, Account Engagement • Project Management Methodologies • Duplicate Management & Record Hygiene • User Training, Documentation & Support • CRM Governance & Schema Management • Cross-Functional Collaboration

PROFESSIONAL EXPERIENCE

Founder / Systems Architect - Discrete Development LLC

Dec 2025 – Present • Build and administer CRM-driven operational systems, including automated communication pipelines (email, SMS, templated documents). • Design data schemas, validation rules, and workflow logic for small businesses and nonprofits. • Create inquiry forms, application flows, and automated onboarding sequences using PowerApps, Node.js, and CRM integrations. • Develop documentation, training materials, and user onboarding guides for non-technical staff. • Modernize legacy systems, improving data accuracy, reducing duplication, and increasing workflow reliability. • Implement automated record cleanup, duplicate detection, and structured data governance processes.

Freelance / Self-Employed Developer - Klamath Falls, OR

2024 – 2025 • Built multi-user platforms with structured data models, validation logic, and automated communication triggers. • Designed and maintained form-based workflows using Django, Firebase, and custom APIs. • Created reusable import/export pipelines for structured

data (JSON, CSV, MongoDB, REST). • Developed accessibility-first UI components and dynamic form logic for inquiry and application systems. • Built automated email/SMS workflows using serverless functions and CRM-style triggers.

Freudenberg Medical - Global Manufacturing & Medical Device Group - Carpinteria, CA

2013 – 2024

Cloud Support Specialist

2021 – 2024 • Modernized global workflows by converting manual processes into automated SharePoint and Power Automate solutions. • Supported 1,200+ global users across Microsoft E5, improving collaboration and reducing operational friction. • Managed 5+ concurrent technology projects, partnering with department heads to streamline processes and eliminate redundancies. • Improved data accuracy and reduced repetitive tasks through targeted automation initiatives. • Collaborated with Director of Marketing and Sales for Europe and Asia to generate automated Salesforce-driven metrics used in leadership meetings and strategic alignment, ensuring consistent, accurate, and timely reporting across regions. • Imported/exported structured data between SAP, IQMS, and custom ERP systems, maintaining synchronization and data integrity. • Performed daily data quality checks, validation, duplicate cleanup, and structured governance across multiple platforms.

Project Manager

2015 – 2021 • Co-established the PMO, implementing project management methodologies and governance frameworks. • Built custom SharePoint-based CRM-adjacent systems for intake, tracking, communication, and reporting. • Designed automated communication templates, task lists, and document storage structures for multi-department workflows. • Trained staff on new systems, tools, and processes; created SOPs and documentation used globally. • Analyzed operational processes and recommended efficiency improvements across departments.

SAP Data Migration Specialist

2013 – 2015 • Imported and exported structured data across SAP, IQMS, and other systems, including full data mapping, validation, and cleanup. • Ensured data accuracy through validation tools, duplicate detection, and governance procedures. • Designed data schemas, mapping logic, and persistence rules for master data objects. • Trained SMEs on data structures, persistence rules, and system behavior. • Integrated production workflows into SAP using structured forms and ingestible data models.

EARLIER CAREER

NBC • Cimarron Bacon O'Brien • Quark Entertainment • New Wave / Electric Entertainment
Roles included Implementation Engineer, Chief Engineer, Technical Operations Manager, and Editor. Delivered systems implementations, workflow optimization, vendor coordination, and operational support for production-critical environments.

EDUCATION & CERTIFICATIONS

- DeVry University 2002-2005 (CET) Data Structure, Electronic Circuits, Digital Circuits, Distributed Computing, Project Development, Tech Integration
- General Assembly 2025 -Full-Stack Software Development
- Sony Video Institute & AVID Technology 1991-1995 Broadcast Systems & Editing
- Additional coursework in Psychology, Mathematics, and Engineering (UCSB, SMC)

TECHNICAL SKILLS

Platforms Microsoft 365 Ecosystem • SharePoint Online • Power Platform (Apps, Automations, BI) • Azure Services • Intune/SCCM • Structured Data Platforms (Microsoft Lists, SAP, IQMS, custom ERP data mapping)

Development C# • JavaScript • Node.js • React • Express • Python • Django • HTML • CSS • REST APIs • JSON • MongoDB • Firebase • PostgreSQL

Automation Workflow design • Cloud process automation • Email/SMS communication pipelines • Mail merge automation • AI-assisted tooling

Solution Delivery Solution architecture • Systems integration • Workflow automation • Requirements analysis • Testing & troubleshooting • Data validation & diagnostics • Documentation • User training & onboarding

CRM Salesforce (Administration, Account Engagement, Admissions Connect, Form Assembly) • SAP CRM • ServiceNow • Custom CRM/ERP workflow integrations

Integration & Data Mapping Salesforce ↔ ERP/SIS field mapping • Object/field schema alignment & governance • Data type conversion • Data transformation • Data normalization & correction • Structured imports/exports • Validation rules • Duplicate cleanup • Workflow synchronization **Tools:** Power Automate (multi-step data migration, transformation, normalization), Salesforce, SAP, IQMS, ServiceNow, Jitterbit

PROJECTS

Impala Streamer - Product & UX Lead

Built a distributed microprocess system with structured data flows, automated communication triggers, and compartmentalized modules.

ERP-Lite - Product & UX Lead

Created a lightweight ERP-inspired system with defined data schemas, validation rules, structured task lists, and automated communication triggers. Developed as a modular workflow engine enabling consistent data entry, process alignment, and reliable cross-department coordination.
