

KEVIN WAGNER

POWER PLATFORM CONSULTANT | MICROSOFT 365 AUTOMATION | SOFTWARE DEVELOPER

Klamath Falls, OR | (310) 228-8051 | kevin@kevin-wagner.org | kevin-wagner.org | linkedin.com/in/kev613

PROFESSIONAL SUMMARY

Power Platform and Microsoft 365 consultant with 5+ years of hands-on experience designing, building, and supporting Power Apps, Power Automate, SharePoint Online, and data-driven business workflows, backed by more than a decade delivering enterprise systems and SAP-enabled operations. Combines JavaScript and full-stack development capability with process analysis, project leadership, and clear customer communication. Known for converting complex operational requirements into predictable, maintainable solutions and carrying work from discovery through testing, deployment, documentation, and user adoption.

CORE TECHNICAL SKILLS

Power Platform: Power Apps, Power Automate cloud flows, SharePoint Online, Microsoft Lists, Power BI

Development: C#, JavaScript, Node.js, Express, React, HTML/CSS, JSON, REST integrations, Python, Django, MongoDB

Microsoft Cloud: Microsoft 365, Azure-connected services, Teams, Excel, Endpoint Manager, Intune/SCCM

Solution Delivery: Requirements discovery, workflow architecture, data modeling, testing, deployment, documentation, training

Enterprise Systems: SAP implementations, master data migration, governance, validation, global rollout support

PROFESSIONAL EXPERIENCE

Founder & Power Platform / Software Consultant | Discrete Development, LLC 2025–Present | Oregon / Remote

- Architect and deliver Microsoft 365 and custom software solutions that provide the functionality clients need while avoiding unnecessary licensing, infrastructure, and operating costs—maximizing solution value.
- Designed and deployed a production operations system with model-driven business functionality—including customer management, live inventory, replenishment controls, product costing, and fielded-product tracking—using SharePoint Online, Power Automate, and Power BI to meet an explicit requirement to avoid additional premium licensing costs.
- Built Power Automate solutions for product-cost rollups, Excel-to-SharePoint BOM loading, update-or-create processing, duplicate prevention, customer-master synchronization, lead imports, and timesheet-to-invoice aggregation.
- Implemented validation, exception handling, service-account safeguards, summary notifications, and production testing to improve reliability and data integrity across connected workflows.
- Created Power BI reporting and inventory views that expose finished-goods cost, availability, reserved quantity, consumption, and replenishment status for operational decisions.
- Lead discovery and solution design directly with business stakeholders, explain technical decisions in user-friendly language, and provide documentation, training, and production support.
- Develop reusable JavaScript/Node.js components and modular services, including authentication, routing, browser-based interfaces, media processing, diagnostics, and independently deployable integrations.

Cloud Support Specialist | Freudenberg Medical 2021–2024

- Designed and supported business automation using Power Apps, Power Automate, SharePoint, and Microsoft 365 in a global E5 environment serving more than 1,200 users.
- Managed 10+ concurrent initiatives and partnered with department leaders to analyze processes, prioritize requirements, communicate progress, and deliver usable solutions.
- Reduced repetitive work and improved data quality by replacing manual processes with structured forms, SharePoint-based data, automated approvals, notifications, and controlled workflows.
- Provided global user support, troubleshooting, onboarding, and technical guidance across Microsoft cloud and endpoint services.

Project Manager / PMO Co-Lead | Freudenberg Medical 2015–2021

- Co-established the Project Management Office and created SharePoint-based lifecycle tools, governance processes, SOPs, status reporting, and training resources.
- Led 5+ concurrent global SAP and business-system projects with cross-functional teams of up to 50 people, maintaining clear delivery communication from planning through post-implementation review.

SAP Data Migration Specialist | Freudenberg Medical 2013–2015

- Led master-data migration for global SAP implementations, integrating ERP and non-ERP sources and developing validation methods that supported successful go-live events.
- Translated system dependencies for business SMEs, trained stakeholders, and established repeatable migration and data-governance practices.

SELECTED SOFTWARE & SOLUTION DELIVERY

Impala Architecture & Impala Streamer | Discrete Development 2024–Present

- Designed and built a modular, owner-controlled application architecture using C#, JavaScript, Node.js, browser technologies, authentication, independently deployable services, and local/cloud integration patterns.
- Developed the Impala Companion installer in C#, providing a deployable bridge between the user's local environment and the browser-based Impala Streamer experience.
- Demonstrated reliable concurrent media processing, synchronized playback, diagnostics, user preferences, and isolated service behavior across Windows, macOS, browsers, and resource-constrained hardware.

Full-Stack Application Portfolio | Independent Development 2024–Present

- Built and deployed React, Node.js, Express, JavaScript, Django, Python, MongoDB, Firebase, and Netlify applications with reusable components, authentication, routing, responsive interfaces, and maintainable backend patterns.
- Apply accessibility-first and user-centered design principles while keeping technical behavior simple, predictable, and supportable.

EARLIER TECHNICAL LEADERSHIP

Implementation Engineer, Chief Engineer, Technical Operations Manager, and Video Editor roles across NBC, Cimarron Bacon O'Brien, Quark Entertainment, and New Wave / Electric Entertainment (1993–2013). Delivered system implementations, workflow transitions, technical support, AV/IT infrastructure, vendor coordination, training, and operational improvements; increased production capacity by 35% in a chief-engineer role.

EDUCATION & PROFESSIONAL DEVELOPMENT

- General Assembly — Full-Stack Software Development: client/server integration, JavaScript, React, Node.js, Express, Python, and Django
- DeVry University — Low-voltage circuits, digital circuits, business administration, and conflict resolution
- University coursework — Psychology, mathematics, and engineering (UCSB, Santa Monica College, DeVry University)
- Sony Video Institute and AVID Technology — Broadcast systems, editing, troubleshooting, and applied technology certifications

CONSULTING STRENGTHS

Customer-facing discovery and communication • Cross-functional collaboration • Business-friendly solution presentations • Fast-paced project delivery • Documentation and teaching • Production troubleshooting • Continuous improvement
